

A completely embedded interactive figure

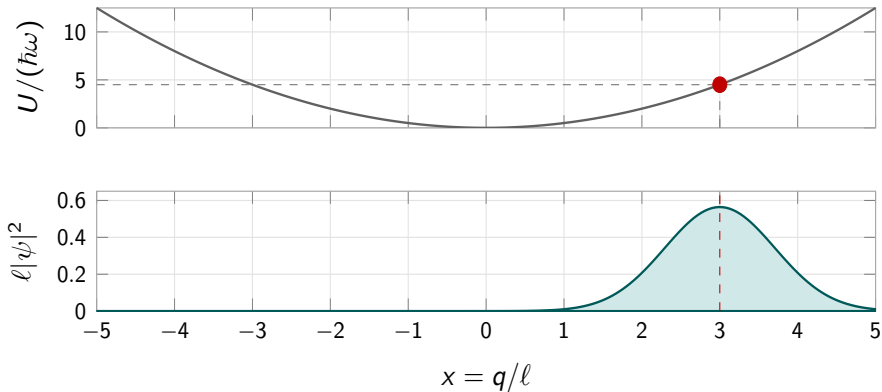

Static PDF fallback: $y = \sin(x)$

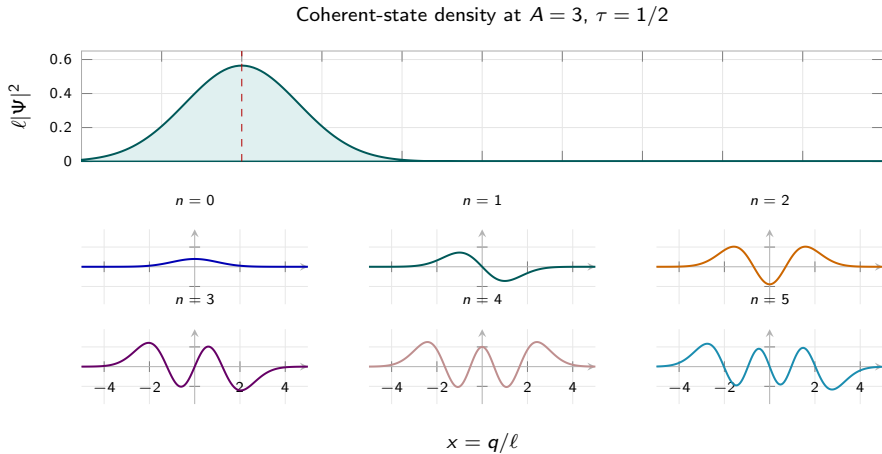

$$y(x, t) = A \sin(fx - \varphi(t))$$

A stretched bond released in the harmonic limit

Displaced coherent state at maximum stretch ($A = 3$, $\tau = 0$)

A coherent packet resolved into basis components

Fitting a step with particle-in-a-box eigenfunctions

Static PDF fallback: five particle-in-a-box basis functions
